GLOBAL-ESTATE RESORTS, INC. AND SUBSIDIARIES

MANAGEMENT DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE 1st QUARTER ENDED March 31, 2022

REVIEW OF RESULTS OF OPERATIONS

(Comparing balances for the 3-month period ended March 31, 2021 and 3-month period ended March 31, 2020)

Consolidated revenues for the three-month period ended March 31, 2022 amounted to Php1.3 billion. The Company's real estate sale of Php1.0 billion came mainly from sale of lots in Newcoast Village in Malay, Aklan, Sta. Barbara Heights in Iloilo City, Twin Lakes Domaine Le Jardin and Lucerne at Domaine Le Jardin in Laurel, Batangas, Pahara at Manila Southwoods, Alabang West in Daang Hari, Las Piñas, Eastland Heights in Antipolo, Rizal, The Hamptons Village in Caliraya, Batangas and sale of condominium units in Oceanway Residences One, Ocean Garden Villas, Belmont Hotel and Chancellor Hotel in Boracay, Holland Park and Tulip Gardens in Manila Southwoods, The Fifth in Ortigas Center, Pasig City and Vineyard Residences, Belvedere and The Manor in Twin Lakes, Tagaytay. Hotel revenues as of March 31, 2022 amounted to Php61 million, an increase of 175% from Php22 million as of March 31, 2021 mainly due to increase in occupancy rate as a result of lifting of travel bans and increase in hotel operations in accordance with quarantine guidelines. Rental income as of March 31, 2022 amounted to Php112 million, a decrease of 7% from Php120 million as of March 31, 2021 due to rent concessions and decrease of occupancy in Southwoods office towers. Balance of revenues was contributed by marketing fees of Php13.4 million, finance and other income of Php63.0 million, and Php40.0 million service income.

Cost and expenses posted an increase of Php32.3 million or 3.7% from Php0.88 billion in March 31, 2021 to Php0.91 billion as of March 31, 2022 mainly due to increase in cost of real estate sales, cost of hotel operations and income tax expense.

The company posted a Php412 million Net Income or 27.8% increase for the period ended March 31, 2022, as compared to a Php322 million net income realized as of March 31, 2021.

Major Movements of Income Statement Accounts are as follows:
(Increase/decrease of 5% or more versus March 31, 2021)

- 14% Increase on Real estate sales – mainly due to increase on real estate sales that reached 10% collection and higher percentage of completion of uncompleted projects because of more relaxed quarantine guidelines
- 175% Increase in Hotel revenues – mainly due to increase in occupancy rate as a result of lifting of travel bans and increase in hotel operations in accordance with quarantine guidelines.
- 7% Decrease in Rental income – due to rent concessions and decrease of occupancy in Southwoods office towers
- 7% Decrease in Service income – due to lower service income for the period.
- 39% Decrease in Marketing fees – due decrease in marketing income from sale of lots of joint venture partner.
- 27% Decrease in Finance and other income – mainly due to decrease in other income
- 7% Increase in Cost of real estate sales – directly related to increase on real estate sales for the period
- 18% Increase in Cost of hotel operations – due to increase in hotel revenue.
- 6% Decrease in Operating expenses – mainly due to implementation of cost reduction measures by the Group

- 23% Decrease in Finance cost and other charges – mainly due to decrease in interest rate and payment of principal.
- 22% Increase in Income tax expense – due to increase of taxable income.

REVIEW OF FINANCIAL CONDITION

The Group's financial position remained stable. Total assets as of March 31, 2022, Php54.3 billion compared to Php54.1 billion as of December 31, 2021, posted an increase of Php0.20 billion. Cash and cash equivalents decreased by 7% mainly due to partial payments of Interest-bearing loans and borrowings, from P3.95 billion as of December 2021 to Php3.68 billion as of March 2022. Contract assets increased by 12%, from Php3.1 billion as of December 2021 to Php3.5 billion as of March 2022 due to additional sales from uncompleted projects with higher percentage of completion than percentage of collection. Advances to related parties decreased by 7% due to collections from related parties.

Customer deposits decreased from Php1.3 billion as of December 2021 to Php1.2 billion as of March 2022 or 8% decrease due to sales recognized for the period. Advances from related parties decreased from Php850.5 million as of December 31, 2021 to Php784.5 million as of March 2022 or 8% decrease due to payments made to related parties.

Shareholders' Equity increased from Php36.1 billion as of December 2021 to Php36.5 billion as of March 2022 mainly due to the income generated for the period.

Major movements of Balance Sheet Accounts are as follows:

- 7% Decrease in Cash and Cash equivalent – mainly due to partial payments of interest-bearing loans
- 12% Increase in Contract assets – due to additional sales from uncompleted projects with higher percentage of completion than percentage of collection.
- 7% Decrease in Advances to Related Parties – due to collections from related parties
- 8% Decrease in Customer's deposit - due to sales recognized for the period.
- 8% Decrease in Advances from Related Parties – due to payments made to related parties

KEY PERFORMANCE INDICATORS

LIQUIDITY RATIOS

	March 31, 2022	December 31, 2021
Current Ratio	4.53	4.37
Quick Ratio	1.53	1.48

Current Ratio (Current Assets/Current Liabilities)
Liquidity ratio measures a company's ability to pay short-term obligations.

Quick Ratio *(Cash and cash equivalents + Current Trade receivables/Current Liabilities)*
It measures a company's ability to meet its short-term obligations with its most liquid assets.

LEVERAGE OR LONG-RANGE SOLVENCY RATIOS

	March 31, 2022	December 31, 2021
Debt to Total Assets	33%	33%
Equity to Total Assets	67%	67%
Debt to Equity	49%	50%
Asset to Equity	1.49	1.50

Debt to Total Assets
It shows the creditors' contribution to the total resources of the organization.

Equity to Total Assets
It shows the extent of owners' contribution to the total resources of the organization.

Debt to Equity
It relates the exposure of the creditors to that of the owners.

Asset To Equity (Total Assets/Total Owner's Equity)
It measures the company's leverage.

PROFITABILITY RATIOS

	March 31, 2022	March 31, 2021
Return on Equity	1.13%	1.04%
Return on Assets	0.76%	0.63%
Earnings per Share	₱ 0.0312	₱ 0.0273

Return on Equity (Net Income Attributable to Parent Company's shareholders/Average Equity Attributable to Parent Company's shareholders)
It tests the productivity of the owners' investments.
Return on Assets (Net Income/Average Total Assets)
This ratio indicates how profitable a company is relative to its total assets.

Earnings per Share (EPS)
It indicates the earnings for each of the common shares held.

ACTIVITY RATIO

	March 31, 2022	March 31, 2021
Asset Turnover	1.90%	1.78%

Asset Turnover (Sales/Total Assets)
It measures the level of capital investment relative to sales volume.

INTEREST COVERAGE RATIO

	March 31, 2022	March 31, 2021
Interest Coverage	5.81	5.35

Interest Coverage Ratio (Earnings before Interest and Income Tax/Interest Expense)
It measures how easily a company can pay interest on an outstanding debt.

OTHERS

As of the 1st quarter ended March 31, 2022, there are no:

- Known trend, demands, commitments, events or uncertainties that would have a material impact on the liquidity of the Company.
- Material commitments for capital expenditures, the general purpose of such commitments and the expected sources of funds for such expenditures.
- Known trends, events or uncertainties that have had or that are reasonably expected to have a material favorable or unfavorable impact on the net sales/revenues/income from continuing operations.
- Significant elements of income or loss that did not arise from the Company's continuing operations.
- Causes for any material changes from period to period in one or more line items of the Company's financial operations.
- Seasonal aspects that had a material effect on the financial condition or results of the operations.
- Events that will trigger direct or contingent financial obligation that is material to the company, including any default or acceleration of an obligation;
- All material off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships of the company with unconsolidated entities of other persons created during the reporting period.

1. CORPORATE INFORMATION

Global-Estate Resorts, Inc. (the Company or GERI) was incorporated in the Philippines on May 18, 1994. It is primarily engaged in the development of integrated tourism and leisure estates, and integrated lifestyle communities with residential, retail, hotel and/or leisure components. The Company also engages in land acquisitions and maintains an inventory of raw land for future development.

On May 25, 2021, the Philippines Securities and Exchange Commission (SEC) approved the change in the Company's registered office and principal place of business from 16th Floor, Alliance Global Tower, 36th Street cor. 11th Avenue, Uptown Bonifacio, Taguig City to 9/F Eastwood Global Plaza, Palm Tree Avenue, Eastwood City, Bagumbayan, Quezon City. The related approval from the Bureau of Internal Revenue (BIR) was obtained on May 21, 2021.

The Company is a subsidiary of Megaworld Corporation (Megaworld or the parent company) with an ownership interest of 82.31%. Megaworld is 67.00% owned by Alliance Global Group, Inc. (AGI), the Company's ultimate parent company.

Megaworld was incorporated in the Philippines primarily to engage in the development of large scale, mixed-use planned communities or townships that integrate residential, commercial, leisure and entertainment components. Megaworld is presently engaged in property-related activities such as product design, construction and property management. Megaworld's real estate portfolio includes residential condominium units, subdivision lots and townhouses, as well as office projects and retail spaces. The registered office of Megaworld, which is also its principal place of business, is located at the 30th Floor, Alliance Global Tower, 36th Street cor. 11th Avenue, Uptown Bonifacio, Taguig City.

AGI is a holding company with diversified investments in real estate, food and beverage, manufacturing, quick service restaurants and tourism-oriented businesses. AGI's registered office, which is also its primary place of business, is located at the 7th Floor, 1880 Eastwood Avenue, Eastwood City CyberPark, 188 E. Rodriguez Jr. Avenue, Quezon City.

The shares of stock of the Company, Megaworld and AGI are listed at the Philippine Stock Exchange (PSE).

1.1 Composition of the Group

Non-controlling interests (NCI) in 1Q2022, 2021 and 2020 represent the interests not held by the Group in FEIPI, SHDI, SWEC, PALC, MGEI, TLC, TLHI, OPI and SMI.

All subsidiaries and associates were incorporated in the Philippines, operate within the country and are engaged in businesses related to the main business of the Company.

Explanatory notes:

(a) Subsidiaries of FEPI; percentage ownership represents effective ownership of GERI.

(b) Subsidiaries of FEGDI; percentage ownership represents effective ownership of GERI.

(c) Subsidiary of SWEC.

(d) Subsidiary acquired in 2018. ECPSI is engaged primarily to manage and administer real estate properties.

(e) Subsidiaries engaged primarily to operate and manage resort hotels.

(f) Subsidiary acquired in prior years primarily to market the Group's projects.

(g) A subsidiary of TLC. The Company is incorporated in 2018 to operate Twin Lakes Hotel, one of the real estate projects of TLC.

(h) Associates because GERI has a representation in the boards of directors.

1.2 Continuing Impact of COVID-19 Pandemic on the Group's Business

The COVID-19 pandemic started to become widespread in the Philippines in early March 2020 and its impact has been continuing until the date of the approval of these financial statements. The measures taken by the government to contain the virus have affected economic conditions and the Group's business operations.

In response to this matter, the Group has taken the following actions:

- maximized digital platforms to sell real estate projects in order to limit face to face engagements;
- focused on sale of residential and commercial lots outside Metro Manila to meet a robust demand of these products;
- assisted tenants in implementing social distancing measures which in effect lowered the foot traffic in malls and commercial spaces;
- continued to work closely with tenants to determine and address their needs;
- expanded outdoor dining areas in lifestyle malls to meet customer demand for alfresco dining though still implementing social distancing measures;
- launched E-Concierge, a mobile application that allows contactless interaction between guests and hotel staff from check-in to check-out, including virtual ordering of food from various food and beverage outlets inside the hotels; and,
- obtained lower cost funding through bank financing to support its business operations, such as financing capital expenditures, land banking and refinancing of loans, and maintain its cash preservation objective.

As a result of the actions taken by management, the Group's operations showed the following results:

- net profit of the Group in 1Q2022 is 27.8% higher than that of 1Q2021;
- real estate sales in 1Q2022 is 13.8% higher as compared to that of 1Q2021 as a result of resumption of construction activities;
- rental income posted a decline of 6.6% in 1Q2022 as compared to 1Q2021. This is the effect of rental concessions, and end of lease contract of a tenant in Southwoods office towers; and,
- revenue from hotel operations increased by 175% in 1Q2022 as compared to 1Q2021 due to increase in occupancy rate as a result of lifting of travel bans and increased hotel operations in accordance with quarantine guidelines.

Management will continue to take actions to continually improve the operations. Based on the foregoing improvements, management projects that the Group would continue to report positive results of operations and would remain liquid to meet current obligations as they fall due. Accordingly, management has not determined a material uncertainty that may cast significant doubt on the Group's ability to continue as a going concern due to the effects of the pandemic.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies that have been used in the preparation of these consolidated financial statements are summarized below and in the succeeding pages. The policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 Basis of Preparation of Consolidated Financial Statements

(a) Statement of Compliance with Philippine Financial Reporting Standards

The consolidated financial statements of the Group have been prepared in accordance with Philippine Financial Reporting Standards (PFRS), as modified by the application of the financial reporting reliefs issued and approved by the SEC in response to the COVID-19 pandemic. The financial reporting reliefs availed of by the Company are disclosed in detail below and in the succeeding pages. PFRS are adopted by the Financial Reporting Standards Council (FRSC) from the pronouncements issued by the International Accounting Standards Board and approved by the Philippine Board of Accountancy (BOA).

The consolidated financial statements have been prepared using the measurement bases specified by PFRS, as modified by the application of the financial reporting reliefs issued and approved by the SEC in response to the COVID-19 pandemic, for each type of asset, liability, income and expense. The measurement bases are more fully described in the accounting policies that follow.

(b) SEC Financial Reporting Reliefs Availed by the Group

In 2020, the Group has availed of several financial reporting reliefs granted by the SEC under Memorandum Circular (MC) No. 14-2018, *Philippine Interpretation Committee Question and Answer (PIC Q&A) No. 2018-12 Implementation Issues Affecting Real Estate Industry*, MC No. 3-2019, *PIC Q&A Nos. 2018-12-H and 2018-14*, MC No. 4-2020, *Deferment of the Implementation of IFRS Interpretations Committee (IFRIC) Agenda Decision on Over Time Transfer of Constructed Goods (PAS 23, Borrowing Costs) for Real Estate Industry*, and MC 34-2020, *Deferral of PIC Q&A No. 2018-12 and IFRIC Agenda Decision on Over Time Transfer of Constructed Goods (PAS 23) for Real Estate Industry for another period of three years or until 2023,* relating to several implementation issues of PFRS 15, *Revenue from Contracts with Customers,* affecting the real estate industry.

In 2021, MC No. 2021-08, A*mendment to SEC MC No. 2018-14, MC No. 2019-03, MC No. 2020-04, and MC No. 2020-34 to clarify transitory provision*, provides real estate companies the accounting policy option of applying either the full retrospective approach or the modified retrospective approach when they apply the provisions of the PIC and IFRIC pronouncement.

Discussed below and in the succeeding page are the financial reporting reliefs availed of by the Group, including the descriptions of the implementation issues and their qualitative impacts to the consolidated financial statements. The Group opted to avail the reliefs until the end of the deferment period as provided under the relevant MC.

Relief	**Description and Implication**	**Deferral period**
IFRIC Decision on Over Time Transfer of Constructed Goods (PAS 23) for Real Estate Industry	The IFRIC concluded that any inventory (work-in-progress) for unsold units under construction that the entity recognizes is not a qualifying asset, as the asset is ready for its intended sale in its current condition (i.e., the developer intends to sell the partially constructed units as soon as it finds suitable customers and, on signing a contract with a customer, will transfer control of any work-in-progress relating to that unit to the customer). Accordingly, no borrowing costs can be capitalized on such unsold real estate inventories. Had the Group elected not to defer the IFRIC Agenda Decision, it would have the following impact in the consolidated financial statements: • finance costs and other charges would have been higher; • cost of real estate inventories sold would have been lower; • total comprehensive income would have been lower; • retained earnings would have been lower; and, • the carrying amount of real estate inventories would have been lower.	Until December 31, 2023

Relief	Description and Implication	Deferral period
PIC Q&A No. 2018-12-D, *Concept of the Significant Financing Component in the Contract to Sell* and PIC Q&A No. 2020-04, *Addendum to PIC Q&A 2018-12-D: Significant Financing Component Arising from Mismatch Between the Percentage of Completion and Schedule of Payments*	PFRS 15 requires that in determining the transaction price, an entity shall adjust the promised amount of consideration for the effects of the time value of money if the timing of payments agreed to by the parties to the contract (either explicitly or implicitly) provides the customer or the entity with a significant benefit of financing the transfer of goods or services to the customer. In those circumstances, the contract contains a significant financing component. There is no significant financing component if the difference between the promised consideration and the cash selling price of the good or service arises for reasons other than the provision of finance to either the customer or the entity, and the difference between those amounts is proportional to the reason for the difference. Further, the Group do not need to adjust the promised amount of consideration for the effects of a significant financing component if the entity expects, at contract inception that the timing difference of the receipt of full payment of the contract price and that of the completion of the project, are expected within one year and significant financing component is not expected to be significant. Had the Group elected not to defer this provision of the standard, it would have an impact in the consolidated financial statements as there would have been a significant financing component when there is a difference between the POC of the real estate project and the right to the consideration based on the payment schedule stated in the contract. The Group would have recognized an interest income when the POC of the real estate project is greater than the right to the consideration and interest expense when lesser. Both interest income and expense will be calculated using the effective interest rate method.	Until December 31, 2023

Relief	Description and Implication	Deferral period
PIC Q&A No. 2018-12-E, *Treatment of land in the determination of POC*	Land on which the real estate development will be constructed shall also be excluded in the assessment of POC. Had the Group elected not to defer this provision of the standard, it would not have an impact on the consolidated financial statements as the cost of land is excluded in the assessment of the POC.	Exclusion of land in the assessment of progress is deferred until December 31, 2023

(c) Presentation of Consolidated Financial Statements

The consolidated financial statements are presented in accordance with Philippine Accounting Standard (PAS) 1, *Presentation of Financial Statements*. The Group presents all items of income and expenses in a single consolidated statement of comprehensive income.

The Group presents a third consolidated statement of financial position at the beginning of the preceding period when it applies an accounting policy retrospectively or makes a retrospective restatement or reclassification of items that has a material effect on the information in the consolidated statement of financial position at the beginning of the preceding period. The related notes to third consolidated statement of financial position are not required to be disclosed.

(d) Functional and Presentation Currency

These consolidated financial statements are presented in Philippine pesos, the Group's presentation and functional currency, and all values represent absolute amounts except when otherwise indicated.

Items included in the consolidated financial statements of the Group are measured using its functional currency, the currency of the primary economic environment in which the Group operates.

2.2 Adoption of Amended PFRS

(a) Effective in 2021 that is Relevant to the Group

The Group adopted for the first time the following amendments to existing standards, which are mandatorily effective for annual periods beginning on or after January 1, 2021:

PFRS 7, PFRS 9, and PFRS 16 (Amendments)	:	Financial Instruments: Disclosures, Financial Instruments, and Leases – Interest Rate Benchmark Reform Phase 2
PFRS 16 (Amendments)	:	Leases – COVID-19-Related Rent Concessions beyond June 30, 2021

Discussed below are the relevant information about these pronouncements.

(i) The Group adopted for the first time the application of the amendments to PFRS 9 (Amendments), *Financial Instruments*, PFRS 7 (Amendments), *Financial Instruments: Disclosures*, and PFRS 16 (Amendments), *Leases - Interest Rate Benchmark Reform Phase 2*. The amendments address issues that may affect financial reporting during the interest rate benchmark reform, including the effect of changes to contractual cash flows or hedging relationships resulting from the replacement of the London Interbank Offered Rate (LIBOR) with alternative benchmark rates. The Phase 2 amendments have no significant impact on the Group's consolidated financial statements as the Group do not have any financial instruments subject to LIBOR.

(ii) PFRS 16 (Amendments), *Leases – COVID-19-Related Rent Concessions Beyond June 30, 2021* (effective from April 1, 2021). The amendment extends for one year the use ofpractical expedient of not assessing whether rent concessions reducing payments up until June 30, 2022 occurring as a direct consequence of the COVID-19 pandemic are lease modifications and instead to account for those rent concessions as if they are not lease modifications. The application of these amendments had no significant impact to the Group's consolidated financial statements as the Group did not receive any rent concession from its lessors in 2021.

(b) Effective Subsequent to 2021 but not Adopted Early

There are pronouncements effective for annual periods subsequent to 2021, which are adopted by the FRSC. Management will adopt the following relevant pronouncements in accordance with their transitional provisions; and, unless otherwise stated, none of these are expected to have significant impact on the Group's consolidated financial statements:

(i) PFRS 3 (Amendments), *Business Combination – Reference to the Conceptual Framework* (effective from January 1, 2022)

(ii) PAS 16 (Amendments), *Property, Plant and Equipment – Proceeds Before Intended Use* (effective from January 1, 2022)

(iii) PAS 37 (Amendments), *Provisions, Contingent Liabilities and Contingent Assets – Onerous Contracts – Cost of Fulfilling a Contract* (effective from January 1, 2022)

(iv) Annual Improvements to PFRS 2018-2020 Cycle. Among the improvements, the following amendments, which are effective from January 1, 2022, are relevant to the Group:

a. PFRS 9 (Amendments), *Financial Instruments – Fees in the "10 per cent" Test for Derecognition of Liabilities*

b. Illustrative Examples Accompanying PFRS 16, *Leases – Lease Incentives*

(v) PAS 1 (Amendments), *Presentation of Financial Statements – Classification of Liabilities as Current or Non-current* (effective from January 1, 2023)

(vi) PAS 1 (Amendments), *Presentation of Financial Statements – Disclosure of Accounting Policies* (effective January 1, 2023)

(vii) PAS 1 (Amendments), *Presentation of Financial Statements – Definition of Accounting Estimates* (effective from January 1, 2023)

(viii) PAS 12 (Amendments), *Income Taxes – Deferred Tax Related to Assets and Liabilities Arising from a Single Transaction* (effective from January 1, 2023)

(ix) PFRS 10 (Amendments), *Consolidated Financial Statements*, and PAS 28 (Amendments), *Investments in Associates and Joint Ventures – Sale or Contribution of Assets Between an Investor and its Associates or Joint Venture* (effective date deferred indefinitely)

(c) PIC Q&As Relevant to the Real Estate Industry Applicable in 2021

Discussed below and in the succeeding page are the PIC Q&As effective January 1, 2021 that are applicable to the Group, including the descriptions of their impact to the Group's consolidated financial statements.

(i) PIC Q&A No. 2018-12-E, Treatment of uninstalled materials in the determination of POC15 and PIC Q&A No. 2020-02, Conclusion on PIC Q&A No. 2018-12-E: *On the Treatment of Materials Delivered on Site but not yet Installed in Measuring the Progress of the Performance Obligation*

PIC Q&A No. 2018-12-E specifies, in recognizing revenue using a cost-based input method, the cost incurred for customized materials not yet installed are to be included in the measurement of progress to properly capture the efforts expended by the Group in completing its performance obligation. In the case of uninstalled materials delivered on-site that are not customized, such as steel and rebars, elevators and escalators, which are yet to be installed or attached to the main structure are excluded in the assessment of progress. Control over the uninstalled materials is not transferred to the customer upon delivery to the site but only when these are installed or when they are used in the construction. In the case of uninstalled materials that are not customized, since the Group is not involved in their design and manufacture, revenue should only be recognized upon installation or use in construction. The application of the PIC Q&A had no significant financial impact to Group's consolidated financial statements since the Group does not include uninstalled materials that are not customized in determining measure of progress for revenue recognition.

(ii) PIC Q&A No. 2020-03, *Conclusion on PIC Q&A No. 2018-12-D: On the Accounting Treatment for the Difference when the POC is Ahead of the Buyer's Payment*

PIC Q&A No. 2020-03 concludes that the difference when the POC is ahead of the buyer's payment can be accounted for either as a contract asset or receivable. The PIC has concluded that both views are acceptable as long as this is consistently applied in transactions of the same nature. The Group assessed to continue its current treatment of accounting for the difference when the POC is ahead of the buyer's payment as part of the Contract Assets account, hence, the adoption did not have a significant impact on the 2021 consolidated financial statements.

(iii) PIC Q&A No. 2020-05, *Accounting for Cancellation of Real Estate Sales (PIC Q&A No. 2020-05 will supersede PIC Q&A No. 2018-14)*

This PIC Q&A superseded PIC Q7A No. 2018-14, The interpretation provides three acceptable approaches in accounting for sales cancellation and repossession of the property as follows:

- Repossessed property is recognized at fair value less cost to repossess;
- Repossessed property is recognized at fair value plus repossession cost; or,
- Cancellation is accounted for as a modification of the contract

The Group assessed that it will account for cancellations of sales contracts and repossession of property as a modification of contract, hence, the adoption of this PIC Q&A did not have a significant impact on the Group's consolidated financial statements.

2.3 Basis of Consolidation

The Group's consolidated financial statements comprise the accounts of the Company, and its subsidiaries as enumerated in the Note 1, after the elimination of material intercompany transactions. All intercompany assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities under the Group, are eliminated in full on consolidation. Unrealized profits and losses from intercompany transactions that are recognized in assets are also eliminated in full. Intercompany losses that indicate impairment are recognized in the consolidated financial statements.

Financial statements of entities in the Group that are prepared as of a date different from that of the date of these consolidated financial statements were adjusted to recognize the effects of significant transactions or events that occur between that date of their reporting period and the date of these consolidated financial statements. Adjustments are also made to bring into line any dissimilar accounting policies that may exist.

The Company accounts for its investments in subsidiaries, associates, interests in joint operations and transactions with NCI as follows:

(a) Investments in Subsidiaries

Subsidiaries are entities (including structured entities) over which the Group has control. The Group controls an entity when it is exposed, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are consolidated from the date the Company obtains control.

The Company reassesses whether or not it controls an entity if facts and circumstances indicate that there are changes to one or more of the three elements of controls indicated above. Accordingly, entities are deconsolidated from the date that control ceases.

The acquisition method is applied to account for acquired subsidiaries. This requires recognizing and measuring the identifiable assets acquired, the liabilities assumed and any NCI in the acquiree. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred and the equity interests issued by the Group, if any. The consideration transferred also includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are expensed as incurred and subsequent change in the fair value of contingent consideration is recognized directly in profit or loss.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the Group recognizes any NCI in the acquiree either at fair value or at the NCI's proportionate share of the acquiree's identifiable net assets.

The excess of the consideration transferred, the amount of any NCI in the acquiree and the acquisition date fair value of any existing equity interest in the acquiree over the acquisition-date fair value of identifiable net assets acquired is recognized as goodwill. If the consideration transferred is less than the fair value of the net assets of the subsidiary acquired in the case of a bargain purchase, the difference (negative goodwill) is recognized directly as gain in profit or loss (see also Note 2.11).

(b) Investments in Associates

Associates are those entities over which the Group is able to exert significant influence but not control and which are neither subsidiaries nor interests in a joint venture. Investments in associates are initially recognized at cost and subsequently accounted for using the equity method.

Acquired investments in associates are also subject to the purchase method. The purchase method involves the recognition of the acquiree's identifiable assets and liabilities, including contingent liabilities, regardless of whether they were recorded in the financial statements prior to acquisition. Goodwill represents the excess of acquisition cost over the fair value of the Company's share of the identifiable net assets of the acquiree at the date of acquisition. Any goodwill or fair value adjustment attributable to the Group's share in the associate is included in the amount recognized as investment in an associate.

All subsequent changes to the ownership interest in the equity of the associates are recognized in the Group's carrying amount of the investments. Changes resulting from the profit or loss generated by the associates are credited or charged against the Equity Share in Net Losses of Associates account in the consolidated statement of comprehensive income.

Impairment loss is provided when there is an objective evidence that the investment in an associate will not be recovered (see Note 2.17).

Changes resulting from other comprehensive income of the associates or items that have been directly recognized in the associate's equity, are recognized in other comprehensive income or equity of the Group, as applicable. However, when the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognize further losses, unless it has incurred obligations or made payments in behalf of the associate. If the associate subsequently reports profits, the Group resumes recognizing its share of those profits only after its share of the profits exceeded the accumulated share of losses that has previously not been recognized. If the investment in associate is subsequently sold, the Group recognize in profit or loss the difference between the consideration received and the carrying amount of the investment.

Distributions received from the associates, if any, are accounted for as a reduction of the carrying value of the investment.

Unrealized gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the Group.

(c) Interests in Joint Operations

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement. A joint control arises from a contractually agreed sharing of control in an arrangement, which exist only when decisions about the relevant activities require unanimous consent of the parties sharing control. For interests in joint operations, the Group recognized in its consolidated financial statements its assets including its share of any assets held jointly; its liabilities including its share of any liabilities incurred jointly; its revenue from sale of its share of the output arising from the joint operation; its expenses including its share of any expenses incurred jointly; and its share in the income from the sale of goods or services by the joint operation. The amounts of these related accounts are presented as part of the regular asset and liability accounts and income and expense accounts of the Group and are measured and recognized in accordance with the relevant financial reporting standards.

No adjustment and consolidation procedures are required for the assets, liabilities, income and expenses of the joint operation that are recognized in the separate financial statements of the joint operators.

(d) Transactions with NCI

The Group's transactions with NCI that do not result in loss of control are accounted for as equity transactions – that is, as transaction with the owners of the Group in their capacity as owners. The difference between the fair value of any consideration paid and the relevant share acquired of the carrying value of the net assets of the subsidiary is recognized in equity. Disposals of equity investments to NCI result in gains and losses for the Group that are also recognized in equity.

When the Group ceases to have control over a subsidiary, any retained interest in the entity is remeasured to its fair value at the date when control is lost, with the change in carrying amount recognized in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognized in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognized in other comprehensive income are reclassified to profit or loss.

The Company holds interests in various subsidiaries and associates as presented in Notes 1.

2.4 Foreign Currency Transactions and Translations

The accounting records of the Parent Company and its subsidiaries are maintained in Philippine Peso. Foreign currency transactions during the year are translated into the functional currency at exchange rates which approximate those prevailing on transaction dates.

Foreign currency gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized as Foreign currency gains (losses) under Finance and Other Income or Charges – net in the consolidated statement of income.

2.5 Financial Assets

Financial assets are recognized when the Group becomes a party to the contractual terms of the financial instrument. For purposes of classifying financial assets, an instrument is considered as an equity instrument if it is non-derivative and meets the definition of equity for the issuer in accordance with the criteria of PAS 32, *Financial Instruments: Presentation*. All other non-derivative financial instruments are treated as debt instruments.

Regular purchases and sales of financial assets are recognized on their trade date (i.e., the date that the Group commits to purchase or sell the asset).

(a) Classification and Measurement of Financial Assets

The classification and measurement of financial assets is driven by the entity's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets. Financial assets are categorized into the following categories: financial assets at amortized cost, financial assets at fair value through profit or loss, and financial assets at fair value through other comprehensive income. The financial asset category currently relevant to the Group is financial assets at amortized cost.

Financial assets are measured at amortized cost if both of the following conditions are met:

- the asset is held within the Group's business model whose objective is to hold financial assets in order to collect contractual cash flows ("hold to collect"); and,

- the contractual terms of the instrument give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Except for trade receivables that do not contain a significant financing component and are measured at the transaction price in accordance with PFRS 15, all financial assets meeting these criteria are measured initially at fair value plus transaction costs. These are subsequently measured at amortized cost using the effective interest method, less allowance for expected credit loss (ECL).

The Group's financial assets at amortized cost are presented in the consolidated statement of financial position as Cash and Cash Equivalents, Trade and Other Receivables [except for Value-added tax (VAT) on contracts with customers, Advances to raw landowners and Advances to officers and employees], Advances to Real Estate Property Owners, Advances to Related Parties, and Refundable deposits (as part of Other Non-current Assets account).

Financial assets measured at amortized cost are included in current assets, except for those with maturities greater than 12 months after the end of reporting period, which are classified as non-current assets.

For purposes of cash flows reporting and presentation, cash and cash equivalents comprise accounts with original maturities of three months or less, including cash. These generally include cash on hand, demand deposits and short-term, highly liquid investments readily convertible to known amounts of cash and which are subject to insignificant risk of changes in value.

Interest income on financial assets at amortized cost is recognized using the effective interest rate method. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument or, when appropriate, a shorter period, to the net carrying amount of the financial asset.

The Group calculates interest income by applying the effective interest rate to the gross carrying amount of the financial assets except for those that are subsequently identified as credit-impaired and or are purchased or originated credit-impaired assets.

For financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the net carrying amount of the financial assets (after deduction of the loss allowance). If the asset is no longer credit-impaired, the calculation of interest income reverts to gross basis. For financial assets that were credit-impaired on initial recognition, interest income is calculated by applying a credit-adjusted effective interest rate to the amortized cost of the asset. The calculation of interest income does not revert to a gross basis even if the credit risk of the asset subsequently improves.

Interest income earned is recognized in the consolidated statement of comprehensive income as part of Finance and Other Income account.

(b) *Impairment of Financial Assets*

At the end of the reporting period, the Group assesses and recognizes allowance for ECL on its financial assets measured at amortized cost. The measurement of ECL involves consideration of broader range of information that is available without undue cost or effort at the reporting date about past events, current conditions, and reasonable and supportable forecasts of future economic conditions (i.e., forward-looking information) that may affect the collectability of the future cash flows of the financial assets. Measurement of the ECL is determined by a probability-weighted estimate of credit losses over the expected life of the financial instruments evaluated based on a range of possible outcome.

The Group applies the simplified approach in measuring ECL, which uses a lifetime expected loss allowance for all trade and other receivables, contract assets, and other financial assets carried at amortized cost. These are the expected shortfalls in contractual cash flows, considering the potential for default at any point during the life of the financial assets. To calculate the ECL, the Group uses its historical experience, external indicators and forward-looking information to calculate the ECL using a provision matrix. The Group also assesses impairment of trade receivables on a collective basis as they possess shared credit risk characteristics, and have been grouped based on the days past due (see Note 29.2).

The Group applies a general approach specifically, in relation to advances to related parties. The maximum period over which ECL should be measured is the longest contractual period where an entity is exposed to credit risk. In the case of these receivables from related parties, which are repayable on demand, the contractual period is the very short period needed to transfer the cash once demanded. Management determines possible impairment based on the sufficiency of the related parties' highly liquid assets in order to repay the Group's receivables if demanded at the reporting date taking into consideration the historical defaults of the related parties. If the Group cannot immediately collect its receivables, management considers the expected manner of recovery to measure ECL. If the recovery strategies indicate that the outstanding balance of advances to related parties can be collected, the ECL is limited to the effect of discounting the amount due over the period until cash is realized.

For other financial assets at amortized cost, ECLs are recognized in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12 months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).
The key elements used in the calculation of ECL are as follows:

- *Probability of Default* – It is an estimate of likelihood of a counterparty defaulting at its financial obligations over a given time horizon, either over the next 12 months or the remaining lifetime of the obligation.

- *Loss Given Default* – It is an estimate of loss arising in case where a default occurs at a given time. It is based on the difference between the contractual cash flows of a financial instrument due from a counterparty and those that the Group would expect to receive, including the realization of any collateral or effect of any credit enhancement.

- *Exposure at Default* – It represents the gross carrying amount of the financial instruments in the event of default which pertains to its amortized cost.

The Group recognizes an impairment loss in profit of loss for all financial assets subjected to impairment assessment with a corresponding adjustment to their carrying amount through a loss allowance account.

(c) *Derecognition of Financial Assets*

The financial assets (or where applicable, a part of a financial asset or part of a group of financial assets) are derecognized when the contractual rights to receive cash flows from the financial instruments expire, or when the financial assets and all substantial risks and rewards of ownership have been transferred to another party. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

2.6 Inventories

Cost of real estate inventories includes acquisition costs of raw land intended for future development, including other costs and expenses incurred to effect the transfer of the property to the Group; related property development costs; and borrowing costs on certain loans incurred during the development of the real estate properties (see Note 2.20). All costs relating to the real estate property sold are recognized as expense as the work to which they relate is performed.

Costs of real estate inventories are assigned using specific identification of their individual costs. These properties and projects are valued at the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs to complete and the estimated costs necessary to make the sale.

The Group recognizes the effect of revisions in the total project cost estimates in the year in which these changes become known. Any impairment loss from a real estate inventory is charged to operations during the period in which the loss is determined.

Repossessed property arising from sales cancellation is recognized at cost. The difference between the carrying amount of the receivable or Contract Asset to be derecognized and the cost of the repossessed property is recognized in the consolidated statement of comprehensive income.

2.7 Prepayments and Other Assets

Prepayments and other current assets pertain to other resources controlled by the Group as a result of past events. They are recognized in the consolidated financial statements when it is probable that the future economic benefits will flow to the entity and the asset has a cost or value that can be measured reliably.

Advances to contractors pertain to advance payments made by the Group for the construction of real estate properties intended for sale (i.e. held as inventory) and investment properties. This is classified as current asset if it will be applied as payments for construction of assets to be classified as inventories. Otherwise, this we be classified as non-current asset.

Other recognized assets of similar nature, where future economic benefits are expected to flow to the Group beyond one year after the end of the reporting period or in the normal operating cycle of the business, if longer, are classified as non-current assets.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (see Note 2.17).

2.8 Property and Equipment

Property and equipment, except land, are carried at acquisition or construction cost less subsequent depreciation, amortization and impairment losses, if any. As no finite useful life for land can be determined, the related carrying amount are not depreciated. Land is stated at cost less any impairment losses.

The cost of an asset comprises its purchase price and directly attributable costs of bringing the asset to working condition for its intended use. Expenditures for additions, major improvements and renewals are capitalized; expenditures for repairs and maintenance are charged to expenses as incurred.

Depreciation and amortization is computed on the straight-line basis over the estimated useful lives of the assets as follows:

Building	50 years
Office furniture, fixtures and equipment	3-5 years
Transportation and other equipment	5 years
Building and office improvements	5-10 years

The residual values, estimated useful lives and method of depreciation and amortization of property and equipment are reviewed, and adjusted if appropriate, at the end of each reporting period.

Fully depreciated and amortized assets are retained in the accounts until they are no longer in use and no further charge for depreciation and amortization is made in respect of those assets.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (see Note 2.17).

An item of property and equipment, including the related accumulated depreciation, amortization and impairment losses, is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in profit or loss in the year the item is derecognized.

2.9 Investment Property

Investment property consists of parcels of land and buildings, including those under construction, held or intended for lease or for capital appreciation or both. Buildings are carried at cost less accumulated depreciation and any impairment losses. Land is stated at cost less any impairment losses.

The cost of an asset comprises its purchase price and any directly attributable costs of bringing the asset to working condition for its intended use. Expenditures for additions, major improvements and renewals are capitalized; expenditures for repairs and maintenance are charged to expense as incurred.

Depreciation is computed on a straight-line basis over the estimated useful life of the assets as follows:

Land development and improvements	20 years
Building and improvements	25-50 years

Construction in progress pertains to the accumulated costs of putting up the assets, additions or improvements including the applicable borrowing costs (see Note 2.20). Cost is recognized when materials purchased and services performed in relation to construction of an asset have been delivered or rendered. When the asset has become available for use, the accumulated cost is transferred to the appropriate investment property account, and depreciation is recognized based on the estimated useful life of such asset.

The residual values, estimated useful lives and method of depreciation of investment property are reviewed and adjusted, if appropriate, at the end of each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its recoverable amount (see Note 2.17).

Transfers from other accounts (such as property and equipment or real estate inventory) are made to investment property when and only when, there is a change in use, evidenced by ending of owner-occupation or commencement of an operating lease to another party, while transfers from investment property are made when, and only when, there is a change in use, evidenced by commencement of the owner-occupation or commencement of development with a view to sell.

For a transfer from investment property to owner-occupied property or inventories, the cost of property for subsequent accounting is its carrying value at the date of change in use.

If an owner-occupied property becomes an investment property, the Group accounts for such property in accordance with the policy stated under Property and Equipment account up to the date of change in use (see Note 2.8).

Investment property is derecognized upon disposal or when permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gain or loss on the retirement or disposal of an investment property is recognized in the consolidated statement of comprehensive income in the year of retirement or disposal.

2.10 Financial Liabilities

Financial liabilities, which include Interest-bearing Loans, Trade and Other Payables (except tax-related liabilities), Advances from Related Parties, Due to Joint Venture Partners, Redeemable Preferred Shares, Lease Liabilities and Other Non-current Liabilities account (except Advance rental), are recognized when the Group becomes a party to the contractual terms of the instrument. These are initially recognized at their fair values and subsequently measured at amortized cost using effective interest method for maturities beyond one year, less settlement payments. All interest-related charges, if any, incurred on financial liability are recognized as an expense in profit or loss under the caption Finance Costs and Other Charges account in the consolidated statement of comprehensive income.

Interest-bearing loans are raised for support of long-term funding of operations. Finance charges, including premiums payable on settlement or redemption and direct issue costs, are charged to profit or loss, except for capitalized borrowing cost, on an accrual basis using the effective interest method and are added to the carrying amount of the instrument to the extent that these are not settled in the period in which they arise.

Preferred shares, which carry a mandatory coupon or are redeemable on specific date or at the option of the shareholder, are classified as financial liabilities and presented as a separate line item in the consolidated statement of financial position as Redeemable Preferred Shares. Dividend distributions to shareholders, if any, are recognized as financial liabilities when the dividends are approved by the BOD. The dividends on the redeemable preferred shares are recognized in the consolidated statement of comprehensive income as interest expense on an amortized cost basis using the effective interest method.

Financial liabilities are classified as current liabilities if payment is due to be settled within one year or less after the end of the reporting period (or in the normal operating cycle of the business, if longer), or the Group does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Otherwise, these are presented as non-current liabilities.

Financial liabilities are derecognized from the consolidated statement of financial position only when the obligations are extinguished either through discharge, cancellation or expiration. The difference between the carrying amount of the financial liability derecognized and the consideration paid or payable is recognized in profit or loss.

2.11 Business Combination

(a) Accounting for Business Combination Using the Acquisition Method

Business acquisitions of entities not under common control of a principal stockholder are accounted for using the acquisition method of accounting [see Note 2.3(a)].

Goodwill, if any, represents the excess of the cost of an acquisition over the fair value of the Group's share of the net identifiable assets of the acquired subsidiary at the date of acquisition. Subsequent to initial recognition, goodwill, if any, is measured at cost less any accumulated impairment losses. Goodwill is tested annually for impairment and carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed. Negative goodwill, which is the excess of the Group's interest in the net fair value of net identifiable assets acquired over acquisition cost, is charged directly to profit or loss.

For the purpose of impairment testing, goodwill is allocated to cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose. The cash-generating units or groups of cash-generating units are identified according to operating segment.

Gains and losses on the disposal of an interest in a subsidiary include the carrying amount of goodwill relating to it.

If the business combination is achieved in stages, the acquirer is required to remeasure its previously held equity interest in the acquiree at its acquisition-date fair value and recognize the resulting gain or loss, if any, in profit or loss or other comprehensive income, as appropriate.

Any contingent consideration to be transferred by the Group is recognized at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration that is deemed to be an asset or liability is recognized in accordance with PAS 37, *Provisions, Contingent Liabilities and Contingent Assets*, either in profit or loss or as a change to other comprehensive income. Contingent consideration that is classified as equity is not remeasured, and its subsequent settlement is accounted for within equity.

(b) Accounting of Business Combination Using the Pooling-of-interests Method

Business combinations arising from transfers of interests in entities that are under the common control of the principal stockholder are accounted for under the pooling-of interests method. Transfers of assets between commonly-controlled entities are accounted for under historical cost accounting; hence, the assets and liabilities are reflected in the consolidated financial statements at carrying values and no adjustments are made to reflect fair values or recognize any new assets or liabilities, at the date of the combination that otherwise would have been done under the acquisition method. No restatements are made to the financial information in the consolidated financial statements for periods prior to the business combination as allowed under PIC Q&A No. 2012-01, PFRS 3.2, *Application of the Pooling of Interest Method for Business Combination of Entities under Common Control in Consolidated Financial Statements* (Amended by PIC Q&As Nos. 2015-01 and 2018-13); hence, the profit and loss of the acquiree is included in the consolidated financial statements for the full year, irrespective of when the combination took place. Also, no goodwill is recognized as a result of the business combination and any excess between the net assets of the acquiree and the consideration paid is accounted for as “equity reserves”, which will eventually be closed to additional paid-in capital. Also, any pre-acquisition income and expenses of a subsidiary are no longer included in the consolidated financial statements.

2.12 Segment Reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the Company’s BOD - its chief operating decision-maker. The BOD is responsible for allocating resources and assessing performance of the operating segments.

In identifying its operating segments, management generally follows the Group’s products and service lines as disclosed in Note 4, which represent the main products and services provided by the Group.

Each of these operating segments is managed separately as each of these service lines requires different resources as well as marketing approaches. All inter-segment transfers are carried out at arm’s length prices.

The measurement policies the Group uses for segment reporting under PFRS 8, *Operating Segments*, are the same as those used in its consolidated financial statements, except that the following are not included in arriving at the operating profit of the operating segments:

- post-employment benefit expenses;
- expenses relating to share-based payments;
- research costs relating to new business activities; and,
- revenue, costs and fair value gains from investment property.

In addition, corporate assets which are not directly attributable to the business activities of any operating segment are not allocated to a segment.

There have been no changes from prior periods in the measurement methods used to determine reported segment profit or loss.

2.13 Provisions and Contingencies

Provisions are recognized when present obligations will probably lead to an outflow of economic resources and they can be estimated reliably even if the timing or amount of the outflow may still be uncertain. A present obligation arises from the presence of a legal or constructive obligation that has resulted from past events.

Provisions are measured at the estimated expenditure required to settle the present obligation, based on the most reliable evidence available at the end of the reporting period, including the risks and uncertainties associated with the present obligation. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. When time value of money is material, long-term provisions are discounted to their present values using a pretax rate that reflects market assessments and the risks specific to the obligation. The increase in the provision due to passage of time is recognized as interest expense. Provisions are reviewed at the end of each reporting period and adjusted to reflect the current best estimate.

In those cases, where the possible outflow of economic resource as a result of present obligations is considered improbable or remote, or the amount to be provided for cannot be measured reliably, no liability is recognized in the consolidated financial statements. Similarly, possible inflows of economic benefits to the Group that do not yet meet the recognition criteria of an asset are considered contingent assets, hence, are not recognized in the consolidated financial statements. On the other hand, any reimbursement that the Group can be virtually certain to collect from a third party with respect to the obligation is recognized as a separate asset not exceeding the amount of the related provision.

2.14 Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the resulting net amount, considered as a single financial asset or financial liability, is reported in the consolidated statement of financial position when the Group currently has legally enforceable right to set off the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously. The right of set-off must be available at the end of the reporting period, that is, it is not contingent on a future event. It must also be enforceable in the normal course of business, in the event of default, and in the event of insolvency or bankruptcy; and must be legally enforceable for both entity and all counterparties to the financial instruments.

2.15 Revenue and Expense Recognition

Revenue comprises revenue from sale of real properties, hotel operations and leasing activities. The Group's leasing activities are accounted for under PFRS 16 (see Note 2.16).

To determine whether to recognize revenue from revenue covered by PFRS 15, the Group follows a five-step process:

(a) identifying the contract with a customer;
(b) identifying the performance obligation;
(c) determining the transaction price;
(d) allocating the transaction price to the performance obligations; and,
(e) recognizing revenue when/as performance obligations are satisfied.

The Group determines whether a contract with customer exists by evaluating whether the following gating criteria are present:

(i) the parties to the contract have approved the contract either in writing, orally or in accordance with other customary business practices;
(ii) each party's rights regarding the goods or services to be transferred or performed can be identified;
(iii) the payment terms for the goods or services to be transferred or performed can be identified;
(iv) the contract has commercial substance (i.e., the risk, timing or amount of the future cash flows is expected to change as a result of the contract); and,
(v) collection of the consideration in exchange of the goods and services is probable.

Revenue is recognized only when (or as) the Group satisfies a performance obligation by transferring control of the promised goods or services to a customer. The transfer of control can occur over time or at a point in time.

A performance obligation is satisfied at a point in time unless it meets one of the following criteria, in which case it is satisfied over time:

- the customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs;
- the Group's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; and,
- the Group's performance does not create an asset with an alternative use to the Group and the entity has an enforceable right to payment for performance completed to date.

The transaction price allocated to performance obligations satisfied at a point in time is recognized as revenue when control of the goods or services transfers to the customer. If the performance obligation is satisfied over time, the transaction price allocated to that performance obligation is recognized as revenue as the performance obligation is satisfied. The Group uses the practical expedient in PFRS 15 with respect to non-disclosure of the aggregate amount of the transaction price allocated to unsatisfied or partially satisfied performance obligations as of the end of the reporting period and the explanation of when such amount will be recognized.

The Group develops real properties such as developed land, house and lot, and condominium units. The Group often enters into contracts to sell real properties as they are being developed. The significant judgment used in determining the timing of satisfaction of the Group's performance obligation with respect to its contracts to sell real properties is disclosed in Note 3.1. Sales cancellations are accounted for on the year of forfeiture. Any gain or loss on cancellation is charged to profit or loss.

The specific recognition criteria of the various revenue streams of the Group are as follows:

(a) *Real estate sales on pre-completed real estate properties* – Revenue from real estate sales is recognized over time proportionate to the progress of the development. The Group measures its progress based on actual costs incurred relative to the total expected costs to be incurred in completing the development. Revenue recognized from real estate sales is presented as part of Real Estate Sales account under Revenues and Income section in the consolidated statement of comprehensive income.

(b) *Real estate sales on completed real estate properties* – Revenue from real estate sales is recognized at point in time when the control over the real estate property is transferred to the buyer. Revenue recognized from real estate sales is presented as part of Real Estate Sales account under Revenues and Income section in the consolidated statement of comprehensive income.

For tax reporting purposes, a modified basis of computing the taxable income for the year based on collections from real estate sales is used by the Group.

(c) *Hotel operations* – Revenues from room accommodation and services are recognized over time during the occupancy of hotel guest and ends when the scheduled hotel room accommodation has lapsed (i.e., the related room services have been rendered). As applicable, invoices for hotel accommodations are due upon receipt by the customer. For food and beverage, revenue is recognized at a point in time upon delivery to and receipt of food and beverage by the customer.

(d) *Service income* – Revenue is recognized over time (i.e., time-and-materials basis as the services are provided) until the performance of contractually agreed tasks has been substantially rendered. Service income comprises fees from maintenance of golf course and management fees.

(e) *Marketing fees* – Revenue is recognized over time in the same amount to which the entity has the right of invoice to the customer. Any amounts remaining unbilled at the end of the reporting period are presented in the consolidated statement of financial position as receivables as only the passage of time is required before payment of these amounts will be due.

Incremental costs of obtaining a contract to sell real property to customers are recognized as part of Prepayments and Other Current Assets and is subsequently amortized over the duration of the contract on the same basis as revenue from such contract is recognized. Other costs and expenses are recognized in profit or loss upon utilization of services or receipt of goods or at the date they are incurred. Finance costs are reported on an accrual basis except capitalized borrowing costs (see Note 2.20).

Contract assets pertain to rights to consideration in exchange for goods or services that the Group has transferred to a customer that is conditioned on something other than passage of time. Under its contracts with customers, the Group will receive an unconditional right to payment for the total consideration upon the completion of the development of the property sold. Any rights to consideration recognized by the Group as it develops the property are presented as Contract Assets in the consolidated statement of financial position. Contract assets are subsequently tested for impairment in the same manner as the Group assesses impairment of its financial assets [see Note 2.5(b)].

Any consideration received by the Group in excess of the amount for which the Group is entitled is presented as Contract Liabilities in the consolidated statement of financial position. A contract liability is the Group's obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer.

If the transaction does not yet qualify as contract revenue under PFRS 15, the deposit method is applied until all conditions for recording the sale are met. Pending the recognition of revenue on sale of real estate, considerations received from buyers are presented under the Customers' Deposits account in the liabilities section of the consolidated statement of financial position.

Costs and expenses are recognized in profit or loss upon utilization of goods or services or at the date they are incurred. All finance costs are reported in profit or loss on an accrual basis, except for capitalized borrowing costs which are included as part of the cost of the related qualifying asset.

2.16 Leases

The Group accounts for its leases as follows:

(a) Group as Lessee

The Group considers whether a contract is, or contains, a lease. A lease is defined as a contract, or part of a contract, that conveys the right to use an asset (the underlying asset) for a period of time in exchange for consideration. To apply this definition, the Group assesses whether the contract meets three key evaluations which are whether:

- the contract contains an identified asset, which is either explicitly identified in the contract or implicitly specified by being identified at the time the asset is made available to the Group;

- the Group has the right to obtain substantially all of the economic benefits from use of the identified asset throughout the period of use, considering its rights within the defined scope of the contract; and,

- the Group has the right to direct the use of the identified asset throughout the period of use. The Group assess whether it has the right to direct 'how and for what purpose' the asset is used throughout the period of use.

At lease commencement date, the Group recognizes a right-of-use asset and a lease liability in the consolidated statement of financial position. The right-of-use asset is measured at cost, which is made up of the initial measurement of the lease liability, any initial direct costs incurred by the Group, an estimate of any costs to dismantle and remove the asset at the end of the lease, and any lease payments made in advance of the lease commencement date (net of any incentives received). Subsequently, the Group depreciates the right-of-use asset on a straight-line basis from the lease commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The Group also assesses the right-of-use asset for impairment when such indicators exist (see Note 2.17).

On the other hand, the Group measures the lease liability at the present value of the lease payments unpaid at the commencement date, discounted using the interest rate implicit in the lease if that rate is readily available or the Group's incremental borrowing rate. Lease payments mainly pertain to fixed payments agreed in the contract. Subsequent to initial measurement, the liability will be reduced for payments made and increased for interest. It is remeasured to reflect any reassessment or modification, or if there are changes in in-substance fixed payments. When the lease liability is remeasured, the corresponding adjustment is reflected in the right-of-use asset, or profit and loss if the right-of-use asset is already reduced to zero.

The Group has elected to account for short-term leases and leases of low-value assets using the practical expedients. Instead of recognizing a right-of-use asset and lease liability, the payments in relation to these are recognized as an expense in consolidated profit or loss on a straight-line basis over the lease term.

On the consolidated statement of financial position, right-of-use assets and lease liabilities have been presented separately from property, plant and equipment and other liabilities, respectively.

(b) Group as Lessor

Leases wherein the Group substantially transfers to the lessee all the risks and benefits incidental to ownership of the leased item are classified as finance leases and are presented as receivable at an amount equal to the Group's net investment in the lease. Finance income are recognized based on the pattern reflecting constant periodic rate of return on the Group's net investment outstanding in respect of the finance lease.

Leases which do not transfer to the lessee substantially all the risks and benefits of ownership of the asset are classified as operating leases. Lease income from operating leases is recognized in profit or loss on a straight-line basis over the lease term.

Sublease which was previously classified as operating lease applying PAS 17, *Leases*, but finance lease applying PFRS 16 is accounted as a new finance lease entered into at the date of initial application of PFRS 16 on January 1, 2019. The effect of recognizing the net investment in the sublease is recognized as adjustment to the opening balance of retained earnings.

2.17 Impairment of Non-financial Assets

The Group's investments in associates, investment property, property and equipment, right-of-use assets and other non-financial assets are subject to impairment testing whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). As a result, assets are tested for impairment either individually or at the cash-generating unit level.

Impairment loss is recognized in profit or loss for the amount by which the asset's or cash-generating unit's carrying amount exceeds its recoverable amount which is the higher of its fair value less costs to sell and its value in use. In determining value in use, management estimates the expected future cash flows from each cash-generating unit and determines the suitable interest rate in order to calculate the present value of those cash flows. The data used for impairment testing procedures are directly linked to the Group's latest approved budget, adjusted as necessary to exclude the effects of asset enhancements. Discount factors are determined individually for each cash-generating unit and reflect management's assessment of respective risk profiles, such as market and asset-specific risk factors.

All assets are subsequently reassessed for indications that an impairment loss previously recognized may no longer exist. An impairment loss is reversed if the asset's or cash generating unit's recoverable amount exceeds its carrying amount.

2.18 Employee Benefits

The Group's employee benefits are recognized and measured as follows:

(a) Post-employment Defined Benefit Plan

A defined benefit plan is a post-employment plan that defines an amount of post-employment benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and salary. The legal obligation for any benefits from this kind of post-employment plan remains with the Group, even if plan assets for funding the defined benefit plan have been acquired. The Group's defined benefit post-employment plan covers all regular full-time employees.

The liability recognized in the consolidated statement of financial position for a defined benefit plan is the present value of the defined benefit obligation (DBO) at the end of the reporting period. The DBO is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows for expected benefit payments using a discount rate derived from the interest rates of a zero coupon government bonds [using the reference rates published by Bloomberg using its valuation technology, Bloomberg Valuation (BVAL)], that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating to the terms of the related post-employment liability. BVAL provides evaluated prices that are based on market observations from contributed sources.

Remeasurements, comprising of actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions and the return on plan assets (excluding amount included in net interest), if any, are reflected immediately in the consolidated statement of financial position with a charge or credit recognized in other comprehensive income in the period in which they arise. Net interest is calculated by applying the discount rate at the beginning of the period, unless there is a plan amendment, curtailment or settlement during the reporting period. The calculation also takes into account any changes in the net defined benefit liability or asset during the period as a result of contributions to the plan or benefit payments. Net interest is reported as part of Finance Costs and Other Charges or Finance and Other Income account in the consolidated statement of comprehensive income.

Past-service costs are recognized immediately in profit or loss in the period of a plan amendment or curtailment.

(b) Termination Benefits

Termination benefits are payable when employment is terminated by the Group before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Group recognizes termination benefits at the earlier of when it can no longer withdraw the offer of such benefits and when it recognizes costs for a restructuring that is within the scope of PAS 37, and involves the payment of termination benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than 12 months after the end of the reporting period are discounted to their present value.

(c) Compensated Absences

Compensated absences are recognized for the number of paid leave days (including holiday entitlement) remaining at the end of each reporting period. They are included in the Trade and Other Payables account of the consolidated statement of financial position at the undiscounted amount that the Group expects to pay as a result of the unused entitlement.

2.19 Share-based Employee Remuneration

The Company grants share options to key executive officers eligible under a stock option plan. The services received in exchange for the grant, and the corresponding share options, are valued by reference to the fair value of the equity instruments granted at grant date. This fair value excludes the impact of non-market vesting conditions (for example profitability and sales growth targets and performance conditions), if any. The share-based remuneration is recognized as an expense in profit or loss with a corresponding credit to retained earnings.

The expense is recognized during the vesting period based on the best available estimate of the number of share options expected to vest. The estimate is subsequently revised, if necessary, such that it equals the number that ultimately vests on vesting date. No subsequent adjustment is made to expense after vesting date, even if share options are ultimately not exercised.

Upon exercise of share option, the proceeds received net of any directly attributable transaction costs up to the nominal value of the shares issued are allocated to capital stock with any excess being recorded as additional paid-in capital (APIC).

2.20 Borrowing Costs

For financial reporting purposes, borrowing costs are recognized as expenses in the period in which they are incurred, except to the extent that they are capitalized. Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset (i.e., an asset that takes a substantial period of time to get ready for its intended use or sale) are capitalized as part of Inventories account (see Note 2.6). The capitalization of borrowing costs commences when expenditures for the asset and borrowing costs are being incurred and activities that are necessary to prepare the asset for its intended use or sale are in progress. Capitalization ceases when substantially all such activities are complete. For income tax purposes, all interest and other borrowing costs are treated as deductible expenses in the period in which they are incurred.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets, if any, is deducted from the borrowing costs eligible for capitalization.

2.21 Related Party Transactions and Relationships

Related party transactions are transfers of resources, services or obligations between the Group and its related parties, regardless whether a price is charged.

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions. These parties include: (a) individuals owning, directly or indirectly through one or more intermediaries, control or are controlled by, or under common control with the Group; (b) associates; and, (c) individuals owning, directly or indirectly, an interest in the voting power of the Group that gives them significant influence over the Group and close members of the family of any such individual.

In considering each possible related party relationship, attention is directed to the substance of the relationship and not merely on the legal form.

Based on the requirement of SEC MC No. 2019-60, *Rules of Material Related Party Transactions for Publicly Listed Companies*, transactions amounting to 10% or more of the total consolidated assets based on the latest audited consolidated financial statements that were entered into with related parties are considered material.

All individual material related party transactions shall be approved by at least two-thirds vote of the board of directors, with at least a majority of the independent directors voting to approve the material related party transactions. In case that a majority of the independent director's vote is not secured, the material related party transaction may be ratified by the vote of the stockholders representing at least two-thirds of the outstanding capital stock. For aggregate related party transactions within a 12-month period that breaches the materiality threshold of 10% if the Group's consolidated total assets based on the latest audited consolidated financial statements, the same board approval would be required for the transaction(s) that meets and exceeds the materiality threshold covering the same related party.

2.22 Income Taxes

Tax expense recognized in profit or loss comprises the sum of current tax and deferred tax not recognized in other comprehensive income or directly in equity, if any.

Current tax assets or liabilities comprise those claims from, or obligations to, fiscal authorities relating to the current or prior reporting period, that are uncollected or unpaid at the reporting period. These are calculated using the tax rates and tax laws applicable to the fiscal periods to which they relate, based on the taxable profit for the year. All changes to current tax assets or liabilities are recognized as a component of tax expense in profit or loss.

Deferred tax is accounted for using the liability method on temporary differences at the end of each reporting period between the tax base of assets and liabilities and their carrying amounts for financial reporting purposes. Under the liability method, with certain exceptions, deferred tax liabilities are recognized for all taxable temporary differences and deferred tax assets are recognized for all deductible temporary differences and the carryforward of unused tax losses and unused tax credits to the extent that it is probable that taxable profit will be available against which the temporary differences can be utilized. Unrecognized deferred tax assets are reassessed at the end of each reporting period and are recognized to the extent that it has become probable that future taxable profit will be available to allow such deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realized or the liability is settled provided such tax rates have been enacted or substantively enacted at the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of each reporting period, to recover or settle the carrying amount of its assets and liabilities.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized.

Most changes in deferred tax assets or liabilities are recognized as a component of tax expense in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

Deferred tax assets and deferred tax liabilities are offset if the Group has a legally enforceable right to set-off current tax assets against current tax liabilities and the deferred taxes relate to the same entity and the same taxation authority.

2.23 Equity

Capital stock represents the nominal value of shares that have been issued.

APIC represents premium received on the issuance of capital stock. Any transaction costs associated with the issuance of shares are deducted from APIC, net of any related income tax benefits.

Revaluation reserves pertain to remeasurements of retirement benefit obligation.

Retained earnings includes all current and prior period results of operations as reported in the profit or loss section of the consolidated statements of comprehensive income and share-based employee remuneration, reduced by the amounts of dividends declared, if any.

Non-controlling interests represent the portion of the net assets and profit or loss not attributable to the Company's shareholders which are presented separately in the Group's consolidated statement of comprehensive income and within the equity in the Group's consolidated statement of financial position and consolidated statement of changes in equity.

2.24 Basic and Diluted Earnings per Share

Basic earnings per share (EPS) is computed by dividing consolidated net profit by the weighted average number of common shares issued and outstanding during the period, adjusted retroactively for any stock dividend, stock split or reverse stock split declared during the current period.

Diluted EPS is computed by adjusting the weighted average number of common shares outstanding to assume conversion of potentially dilutive shares. Currently, the Group's potentially dilutive shares consist only of share options.

2.25 Events after the End of the Reporting Period

Any post-year-end event that provides additional information about the Group's financial position at the end of the reporting period (adjusting event) is reflected in the consolidated financial statements. Post-year-end events that are not adjusting events, if any, are disclosed when material to the consolidated financial statements.

3. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES

The preparation of the Group's consolidated financial statements in accordance with PFRS requires management to make judgments and estimates that affect amounts reported in the consolidated financial statements and related notes. Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual results may ultimately vary from these estimates.

3.1 Critical Management Judgments in Applying Accounting Policies

In the process of applying the Group's accounting policies, management has made the judgments in the succeeding pages, apart from those involving estimation, which have the most significant effect on the amounts recognized in the consolidated financial statements.

(a) Determination of Lease Term of Contracts with Renewal and Termination Options

In determining the lease term, management considers all relevant factors and circumstances that create an economic incentive to exercise a renewal option or not exercise a termination option. Renewal options and/or periods after termination options are only included in the lease term if the lease is reasonably certain to be extended or not terminated.

The lease term is reassessed if an option is actually exercised or not exercised or the Group becomes obliged to exercise or not exercise it. The assessment of reasonable certainty is only revised if a significant event or a significant change in circumstances occurs, which affects this assessment, and that is within the control of the Group.

The Group determines whether any non-cancellable period or notice period in a lease would meet the definition of a contract and thus, would be included as part of the lease term. A contract would be considered to exist only when it creates rights and obligations that are enforceable.

In assessing the enforceability of a contract, the Group considers whether the lessor can refuse to agree to a request from the Group to extend the lease. In contrast, a lessor's right to terminate a lease is ignored when determining the lease term because, in that case, the lessee has an unconditional obligation to pay for the right to use the asset for the period of the lease, unless and until the lessor decides to terminate the lease.

(b) Evaluation of the Timing of Satisfaction of Performance Obligations

(i) Real Estate Sales

The Group exercises significant judgment in determining whether each performance obligation to develop properties promised in its contracts with customers is satisfied over time or at a point in time. In making this judgment, the Group considers the following:

- any asset created or enhanced as the Group performs;
- the ability of the customer to control such asset as it is being created or enhanced;
- the timing of receipt and consumption of benefits by the customer; and,
- the Group's enforceable right for payment for performance completed to date.

The Group determines that its performance obligation for pre-completed real estate properties is satisfied over time since it does not have an alternative use of the specific property sold as it is precluded by its contract from redirecting the use of the property for a different purpose. Further, the Group has rights over payment for development completed to date as the Group can choose to complete the development and enforce its rights to full payment under its contracts even if the customer defaults on amortization payments. On the other hand, performance obligation for completed real estate properties is satisfied at a point in time when the control over the real estate property is transferred to the buyer.

(ii) Hotel Operations

The Group determines that its revenue from hotel operations shall be recognized over time. In making its judgment, the Group considers the timing of receipt and consumption of benefits provided by the Group to the customers. The Group provides the services without the need of reperformance of other companies. This demonstrates that the customers simultaneously receive and consume the benefits of the Group's rendering of hotel services as it performs.

(iii) Forfeited Collections and Deposits

The Group determines that its revenue from forfeited collections and deposits shall be recognized at point in time in the year the contract was cancelled.

(c) Determination of ECL on Trade and Other Receivables, Contract Assets and Advances to Related Parties

The Group uses a provision matrix to calculate ECL for trade and other receivables and contract assets. The provision rates are based on days past due for group of various customer segments that have similar loss patterns (i.e., product type, customer type, and coverage by letters of guarantee and other forms of credit insurance).

The provision matrix is based on the Group's historical observed default rates. The Group's management intends to regularly calibrate (i.e., on an annual basis) the matrix to consider the historical credit loss experience with forward-looking information (i.e., forecast economic conditions). Details about the ECL on the Group's trade and other receivables are disclosed in Note 29.2(b).

In relation to advances to related parties, that the maximum period over which ECL should be measured is the longest contractual period where the Group is exposed to credit risk. In the case of these receivables from related parties, which are repayable on demand, the contractual period is the very short period needed to transfer the cash once demanded. Management determines ECL based on the sufficiency of the related parties' highly liquid assets in order to repay the Group's receivables if demanded at the reporting date, taking into consideration the historical defaults of the related parties. If the Group cannot immediately collect its receivables, management considers the expected manner of recovery to measure ECL. If the recovery strategies indicate that the outstanding balance of receivables can be fully collected, the ECL is limited to the effect of discounting the amount due over the period until cash is realized.

Based on the relevant facts and circumstances existing at the reporting date, management has assessed that all strategies indicate that the Group can fully recover the outstanding balance of its receivables, except for those discussed in Note 29.2(b).

(d) Distinction among Investment Property and Owner-occupied Properties

The Group determines whether an asset qualifies as an item of investment property or owner-occupied property. In making its judgment, the Group considers whether the property generates cash flows largely independently of the other assets held by an entity. Owner-occupied properties generate cash flows that are attributable not only to property but also to other assets used in the operations of the Group or for administrative purposes.

Some properties comprise a portion that is held to earn rental or for capital appreciation and another portion that is held for administrative purposes. If these portions can be sold separately (or leased out separately under finance lease), the Group accounts for the portions separately. If the portions cannot be sold separately, the property is accounted for as investment property only if an insignificant portion is held for administrative purposes. Judgment is applied in determining whether ancillary services are so significant that a property does not qualify as investment property. The Group considers each property separately in making its judgment.

(e) Distinction Between Real Estate Inventories and Investment Properties

Residential and condominium units comprise properties that are held for sale in the ordinary course of business. Meanwhile, investment properties comprise of land and buildings which are not occupied substantially for use by, or in the operations of, the Group, nor for sale in the ordinary course of business, but are held primarily to earn rental income and capital appreciation. The Group considers management's intention over these assets in making its judgment.

(f) Determination of Significant Influence over Entities in which the Group Holds Less than 20% Ownership

The Group determines whether significant influence exists over an investee company over which the Group holds less than 20% of the investee's capital stock. The Group considers the ability to influence the operating and financial policies of the investee, representation on the board of directors of the investee, provision of essential technical information for the development of the various projects of these investees, and routine participation in management decisions in making its judgment. Based on management's judgment, the Group has significant influence over these investee companies (see Note 1).

(g) Consolidation of Entities in which the Company Holds 50% Ownership or Less

Management considers that the Company has de facto control over OPI even though it does not hold more than 50% of the ordinary shares and voting rights of this subsidiary due to the factors discussed below.

The Company holds 50% equity interest over OPI and has: (1) the ability to direct the relevant activities of the subsidiary; (2) the rights to variable returns from its involvement with the subsidiary; and, (3) the ability to use its power to affect its returns from its involvement with the subsidiary. Based on management's judgment, the Company has control over OPI; hence, the said subsidiary was consolidated in the financial statements of the Group.

(h) Distinction Between Operating and Finance Leases (as a Lessor)

The Group has entered into various lease agreements. Critical judgment was exercised by management to distinguish each lease agreement as either an operating or finance lease by looking at the transfer or retention of significant risk and rewards of ownership of the properties covered by the agreements. Failure to make the right judgment will result in either overstatement or understatement of assets and liabilities. Based on management assessment, the Group's lease agreements, as lessor, are classified either operating or finance leases.

(i) Recognition of Provisions and Contingencies

Judgment is exercised by management to distinguish between provisions and contingencies. Policies on recognition and disclosure of provision and contingencies are discussed in Note 2.13 and relevant disclosures are presented in Note 28.

3.2 Key Sources of Estimation Uncertainty

The key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next reporting period are discussed in the succeeding pages.

(a) Determination of Appropriate Discount Rate in Measuring Lease Liabilities

The Group measures its lease liabilities at present value of the lease payments that are not paid at the commencement date of the lease contract. The lease payments were discounted using the effective interest rate on the most recent loan. Since the date of the availment is near the initial date of application, management is satisfied that the selected rate reflects the risks specific to the Group.

(b) Business Combinations

On initial recognition, the assets and liabilities of the acquired business and the consideration paid for them are included in the consolidated financial statements at their fair values. In measuring fair value, management uses estimates of future cash flows and discount rates. Any subsequent change in these estimates would affect the amount of goodwill if the change qualifies as a measurement period adjustment. Any other change would be recognized in profit or loss in the subsequent period.

(c) Revenue Recognition for Performance Obligations Satisfied Over Time

In determining the amount of revenue to be recognized for performance obligations satisfied over time, the Group measures progress on the basis of actual costs incurred relative to the total expected costs to complete such performance obligation. Specifically, the Group estimates the total development costs with reference to the project development plan and any agreement with customers. Management regularly monitors its estimates and apply changes as necessary. A significant change in estimated costs would result in a significant change in the amount of revenue recognized in the year of change.

(d) Estimation of Allowance for ECL

The measurement of the allowance for ECL on financial assets at amortized cost is an area that requires the use of significant assumptions about the future economic conditions and credit behavior (e.g., likelihood of customers defaulting and the resulting losses). Explanation of the inputs, assumptions and estimation used in measuring ECL is further detailed in Note 29.2.

(e) Determination of Net Realizable Value of Inventories

In determining the net realizable value of inventories, management takes into account the most reliable evidence available at the times the estimates are made. The future realization of the carrying amounts of these assets is affected by price changes in the different market segments as well as the trends in the real estate industry. These are considered key sources of estimation and uncertainty and may cause significant adjustments to the Group's inventories within the next reporting period.

Considering the Group's pricing policy, the net realizable values inventories are higher than their related carrying values as of the end of the reporting periods.

(f) Fair Value of Stock Options

The Company estimates the fair value of the executive stock option by applying an option valuation model, taking into account the terms and conditions on which the executive stock option were granted. The estimates and assumptions used are presented in Note 26.2, which include, among other things, the option's time of expiration, applicable risk-free interest rate, expected dividend yield, volatility of the Company's share price and fair value of the Company's common shares. Changes in these factors can affect the fair value of stock options at grant date.

(g) Estimation of Useful Lives of Investment Property, Property and Equipment and Right-of-use Assets

The Group estimates the useful lives of investment property, property and equipment and right-of-use assets based on the period over which the assets are expected to be available for use. The estimated useful lives of investment property, property and equipment, and development right are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets.

The carrying amounts of investment property, property and equipment, and right-of-use assets are analyzed in Notes 11, 12 and 13, respectively. Based on management's assessment as at December 31, 2021 and 2020, there are no changes in the estimated useful lives of those assets as of the end of the reporting periods. Actual results, however, may vary due to changes in estimates brought about by changes in factors mentioned above.

(h) Fair Value Measurement of Investment Property

Investment property is measured using the cost model. For disclosure purposes, the Group determines the fair values of building and building improvements using the discounted cash flows valuation technique since the information on current or recent prices of assumptions underlying the discounted cash flow approach of investment property is not available. The Group uses assumptions that are mainly based on market conditions existing at the end of each reporting period, such as: the receipt of contractual rentals; expected future market rentals; void periods; maintenance requirements; and appropriate discount rates.

These valuations are regularly compared to actual market yield data and actual transactions by the Group and those reported by the market. The expected future market rentals are determined on the basis of current market rentals for similar properties in the same location and condition.

For land and land development and improvements, the Group determines the fair value of land through appraisals by independent valuation specialists using market-based valuation approach where prices of comparable properties are adequate for specific market factors such as location and condition of the property.

A significant change in these elements may affect prices and the value of the assets.

(i) Determination of Realizable Amount of Deferred Tax Assets

The Group reviews its deferred tax assets at the end of each reporting period and reduces the carrying amount to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Management assessed that the deferred tax assets recognized as at December 31, 2021 and 2020 will be fully utilized within the prescribed period of availment.

(j) Impairment of Non-financial Assets

PFRS requires that an impairment review be performed when certain impairment indicators are present. The Group's policy on estimating the impairment of non-financial assets is discussed in detail in Note 2.17. Though management believes that the assumptions used in the estimation of fair values reflected in the consolidated financial statements are appropriate and reasonable, significant changes in these assumptions may materially affect the assessment of recoverable values and any resulting impairment loss could have a material adverse effect on the results of operations.

In 2019, certain advances to contractors were found to be impaired. No impairment losses were recognized on investment property, property and equipment, and right-of-use assets and other non-financial assets for the years ended December 31, 2021, 2020 and 2019.

(k) Valuation of Post-employment Defined Benefit Obligation

The determination of the Group's obligation and cost of post-employment defined benefit is dependent on the selection of certain assumptions used by actuaries in calculating such amounts. Those assumptions include, among others, discount rates and salary rate increase. A significant change in any of these actuarial assumptions may generally affect the recognized expense, other comprehensive income or losses and the carrying amount of the retirement benefit obligation in the next reporting period.

(l) Basis for Revenue Recognition Benchmark

The Group recognizes its revenue from sale of real estate in full when 10% or more of the total contract price is received. Management believes that the revenue recognition criterion on percentage of collection is appropriate based on the Group's collection history from customers and number of back-out sales in prior years. Buyer's interest in the property is considered to have vested when the payment of at least 10% of the contract price has been received from the buyer and the Group has ascertained the buyer's commitment to complete the payment of the total contract price.

4. **Segment revenue and segment results for business segments or geographical segments, whichever is the enterprise's primary basis of segment reporting.**

The following table present revenue and income information for the 1st quarter ended March 31, 2022 and March 31, 2021.

March 31, 2022
(Amount in thousands)

	Sales of Real Estate	Hotel Operations	Rentals and Services	Total
Revenue	₱1,034,270	₱60,616	₱152,054	₱1,246,940
Cost	416,788	37,664	73,187	527,639
Gross profit	**₱617,482**	**₱22,952**	**₱78,867**	**₱719,301**

March 31, 2021
(Amount in thousands)

	Sales of Real Estate	Hotel Operations	Rentals and Services	Total
Revenue	₱908,601	₱22,039	₱162,968	₱1,093,608
Cost	390,292	31,911	71,253	493,456
Gross profit	**₱518,309**	**(₱ 9,872)**	**₱ 91,715**	**₱600,152**

5. Material events subsequent to the end of the interim period that have not been reflected in the financial statements for the period.
There have been no material events that happened subsequent to the interim period that need disclosure herein.

6. Effect of changes in the composition of the enterprise during the interim period, including business combinations, acquisition or disposal of subsidiaries and long-term investments, restructurings, and discontinuing operation.
Not applicable.

7. Changes in contingent liabilities or contingent assets since the last annual balance sheet date
The Company is a party to certain lawsuits or claims arising from the ordinary course of business and from several of its joint venture agreements. The Group's management and legal counsels believe that the eventual liabilities under these lawsuits or claims, if any, will not have a material effect on the consolidated financial statements, and thus, no provision has been made for these contingent liabilities.

8. Existence of material contingencies and any other events or transactions that are material to an understanding of current interim period.
There have been no material contingencies and any other events or transactions that are material to an understanding of current interim period.

10. Any events that will trigger direct or contingent financial obligations that is material to the company, including any default or acceleration of an obligation.

There have been no events that will trigger direct or contingent financial obligations that is material to the company, including any default or acceleration of an obligation.

11. All material off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships of the company with unconsolidated entities or other persons created during the reporting period.
There have been no material off-balance sheet transactions and other relationships of the company with unconsolidated entities or other persons created during the reporting period.

12. Dividends paid separately for ordinary shares and other shares
Not applicable.

13. Seasonality or cyclicality of interim operations
Not applicable

14. Nature and amount of items affecting assets, liabilities, equity, net income, or cash flows that are unusual because of their nature, size and incidence.
Not applicable

15. Issuances, repurchases, and repayments of debt and equity securities
There have been no issuance, repurchase and repayment of debt and equity securities for the period.

RISK MANAGEMENT OBJECTIVES AND POLICIES

The Group's financial instruments comprise of cash, short-term bank deposits and investments.

Exposures to credit and liquidity risk arise in the normal course of the Group's business activities. The main objectives of the Group's financial risk management are as follows:

1. To identify and monitor such risks on an ongoing basis;
2. To minimize and mitigate such risks; and
3. To provide a degree of certainty about costs.

Credit Risk

The investment of the Group's cash resources is managed so as to minimize risk while seeking to enhance yield. The Group's holding of cash and marketable securities expose the Group to credit risk of the counterparty if the counterparty is unwilling or unable to fulfill its obligations, and the Group consequently suffers financial loss. Credit risk management involves entering into financial instruments only with counterparties with acceptable credit standing. The treasury policy sets aggregate credit limits of any one counterparty and annually reviews the exposure limits and credit ratings of the counterparties. The Group has credit management policies in place to ensure that rental contracts are entered into with customers who have sufficient financial capacity and good credit history.

Sales to buyers of real estate which are collectible on installment are relatively risk-free. Sales to real estate buyers are documented under Contract to Sell agreements which allow cancellation of the sale and forfeiture of payments made in the event of default by buyers. Transfer of title is made to buyers only upon full payment of the account.

Receivable balances are being monitored on a regular basis to ensure timely execution of necessary intervention efforts.

Liquidity Risk

The Group manages its liquidity needs by carefully monitoring scheduled debt servicing payments for long-term financial liabilities as well as cash outflows due in a day-to-day business. Liquidity needs are monitored in various time bands, on a day-to-day and week-to-week, as well as on the basis of a rolling 30-day projection. Long-term needs for a six-month and one-year period are identified monthly.

The Group maintains cash to meet its liquidity requirements for up to 60-day periods. Excess cash is invested in time deposits or short-term marketable securities. Funding for long-term liquidity needs is additionally secured by an adequate amount of committed credit facilities and the ability to sell long-term financial assets.

Interest Rate Risk

The Group has no significant exposure to interest rate risk as some financial assets and liabilities are fixed-interest bearing.

Foreign Exchange Risk

Most of the Group's transactions are carried out in Philippine pesos, its functional currency. The currency exchange rates arise from Group's United States (U.S.) dollar-denominated cash and cash equivalents.

Management assessed that the foreign currency risks related to these U.S. dollar-denominated cash and cash equivalents to be not material.

CAPITAL MANAGEMENT OBJECTIVES, POLICIES AND PROCEDURES

The Group's capital management objectives are to ensure the Group's ability to continue as a going concern and to provide an adequate return to shareholders.

The Group sets the amount of capital in proportion to its overall financing structure, i.e., equity and financial liabilities. The Group manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, issue new shares or sell assets to reduce debt.

The Group monitors capital on the basis of the carrying amount of equity as presented on the face of the consolidated statements of financial position. Capital for the reporting periods under review is summarized as follows:

(*Figures in thousands)*

	March 2022	December 2021
Total Liabilities	P 17,833,170	P 18,047,180
Total Equity	36,483,121	36,070,890
Debt-to-equity ratio	0.49:1	0.50:1

CATEGORIES AND FAIR VALUES OF FINANCIAL ASSETS AND LIABILITIES

The fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. In determining the fair value of its financial assets and liabilities, the Company takes into account its current circumstances and the costs that would be incurred to exchange or settle the underlying financial assets and liabilities.

The carrying amounts and fair value of the categories of financial assets and liabilities presented in the consolidated financial statement of financial position are shown on the next page:
